PORTLAND SELECT

“WE’LL CONTINUE MAKING FINE BOOTS UNTIL THEY PASS A LAW REQUIRING BUILT-IN OBSOLESCENCE. UNTIL THEN, WE ARE GOING TO GIVE YOU BOOTS THAT YOU CAN BE PROUD TO WEAR, BOOTS THAT CAN CLAIM THE BEST QUALITY AVAILABLE ANYWHERE.”

Bill Danner

Inspired by the rugged loggers and demanding conditions of the Pacific Northwest, he set out to build the highest-quality boots for the outdoors. For the past 90 years, this pioneering spirit has produced iconic Danner styles including the Mountain Light and Danner Light. Today, our Portland Select collection honors this legacy of quality: boots made in our USA factory with unmatched craftsmanship and premium materials that perform in any environment.

Danner.com/PortlandSelect

CRAFTED AND RECRAFTED IN THE USA

Every pair of Portland Select boots is built with care in our Portland, Ore. factory, drawing from the knowledge and skill accumulated over eight decades of boot making with the finest quality components. Our commitment to handcraft each pair of boots in the USA means we are able to mind each detail, down to the last stitch.

We believe a pair of boots that is well cared for should last for years — and we back that belief with our Recrafting services. Our skilled craftsmen and women can often give new life to a pair of boots after years of wear, replacing outsoles, reconditioning leather and restitching seams. From simple part replacements to major overhauls, we can often help get your boots back on the trail, workshop or wherever your next adventure takes you.

Danner.com/Recrafting

DAVID GREENHILL

OLD-GROWTH WOOD RECLAIMER

David Greenhill's mission is to save the trees — but not in the way you think. He and his wife Emily are the owners of Portland's Good Wood, a lumber company that reclaims wood from 100-year-old structures in the Pacific Northwest and fences from California backyards.

40-PLUS YEARS OF HIKING BOOT GREATNESS

Ask a seasoned backpacker what the ideal hiking boot looks like, and you're bound to hear a description of the Mountain Light. That's because for more than 30 years, the Mountain Light set the standard for every new product that hit the market. And in all that time, nothing ever dethroned the original. Today, we're proud to re-introduce this classic boot. Every single pair is built by hand in Portland, Ore., with full-grain leather, Vibram® Kletterlift outsoles, and optional waterproof GORE-TEX liners. The result is a classic design that provides unmatched comfort and support.

THE ORIGINAL DANNER HIKING BOOT

Built in our Portland, Oregon, factory, the Danner Mountain Trail is based on one of our vintage silhouettes from the 60's. It features a domestically-tanned leather and is leather lined. The Vibram Gumlite outsole is lightweight and cushioning, while offering a solid tread for city-to-mountain escapes.

MODERN UPGRADES TO OUR CLASSIC DANNER LIGHT

Made in our Portland, Ore., factory, the Danner Ridge was created to be a lighter weight and more versatile hiking boot that still reflects our classic Danner styling. Built with light hikes and city streets in mind, the overall design is inspired by our original Danner Light with an updated construction method that integrates the shank, midsole and lasting board into a single piece. This new, unified platform, combined with a Vibram® outsole, allowed us to significantly reduce weight and create an out-of-the-box comfort that doesn't come standard with most classic hiking boots.

SETTING THE STANDARD WITH GORE-TEX LINERS SINCE 1979

Durable 1000 denier nylon panels and full grain leather upper set this Danner Light apart from its predecessors. This boot has classic features such as stitchdown construction and rugged Vibram® Kletterlift outsoles. The updated materials provide outstanding protection and support in a relatively lightweight package, suitable for everyday urban wear or use on the trails.

A HIKING LEGEND REMADE FOR CITY STREETS

Even a hiking legend has to come down from the mountain sometime. For more than 40 years, the Mountain Light set the standard for every new backpacking boot that hit the market. And in all that time, nothing ever dethroned the original. This version of the Mountain Light updates the classic hiker for urban adventures. They're handcrafted in Portland, Oregon, with a premium full-grain leather upper, a waterproof GORE-TEX liner and a Danner Wedge Outsole that provides comfort and support.

SETTING THE STANDARD WITH GORE-TEX LINERS SINCE 1979

As far as this boot is concerned, it's still the golden era of backpacking. To build it, Danner bootmakers sought out leathers similar to those used on the original Danner Light, introduced in 1979. This classic-inspired boot features stitchdown construction and a Vibram® Kletterlift outsole. The Danner Light is still built by hand, in our Portland, Ore., factory with rich full grain leather, denier nylon panels and waterproof GORE-TEX liners.

MADE IN USA
Made in USA, Danner Portland Select boots are built by hand in our factory in Portland, Ore. Drawing from the knowledge and skills accumulated over eight decades of boot making, our trained craftsmen and women construct each pair of boots with precision and extreme attention to detail. With a focus on quality, performance and durability, Danner boots are made to last.

STITCHDOWN CONSTRUCTION
Handcrafted to provide a wider platform, our legendary stitchdown construction offers increased stability underfoot. Many of our stitchdown boots can be recrafted.

GORE-TEX
Oregon's lush but rough terrain was the perfect backdrop to inspire a high performance boot, designed to keep feet dry and comfortable in the most extreme of environments. An innovator since its inception, in 1979, Danner became the first company to use GORE-TEX to build a 100% waterproof, breathable boot.

VIBRAM
For more than 60 years, Danner has featured premium Vibram® outsoles on our boots to provide the best traction available for hiking and everyday use. Tried and true designs such as the Kletterlift outsole are featured throughout the line. New technologies such as Vibram® Megagrip and Arctic Grip are now available in some Portland Select styles, providing extra grip in wet and icy conditions.

FIT
Portland Select styles offer a roomier fit for relaxed comfort while still offering rugged support and stability. Our EE sizing is not as wide as others, so it offers the most universal fit for casual, everyday wear. We recommend sizing down a half size for the best fit.

RECRAFTING
You can go a long way in a pair of Danner boots. And since many of our boots can be recrafted by replacing the outsole, reworking the leather and restitching the seams, you can go even farther. Our craftsmen and women can provide everything from simple part replacement and leather care to major overhauls. For information on Danner's recrafting services, please visit danner.com/recrafting
